Name of IMS document:	Energy policy of KazTransOil JSC	
Policy		page 1 of 2
Developed by: Technological Regimes and Energy Management Department	Approved by the resolution of the Management Board of KazTransOil JSC (Minutes of the meeting as of <u>20.01</u> 2023 No. <u>1</u>)	

KazTransOil JSC (the Company) expresses its commitment to the principles of sustainable development, continuous improvement of energy performance and reduction of energy intensity and refers the introduction of energy-saving attitude and energy-efficient behavior to the main priorities of its activities.

The Company intends to implement the best available techniques and administrative solutions aimed at energy saving and improving energy efficiency, while taking care to reduce the specific energy intensity of production to the level of world standards in view of the external and internal factors, the requirements and expectations of stakeholders.

The Company, being a subject of the State Energy Registry, understanding the degree of its influence on energy consumption at the national level, assumes the following obligations:

- 1) unconditionally fulfill the requirements of the legislation of the Republic of Kazakhstan, international and national standards, internal documents of the Company in the field of energy saving and energy efficiency improvement;
- 2) continuously improve energy performance and increase suitability, adequacy and efficiency of the energy management system;
- 3) ensure availability of information and resources necessary to achieve energy goals and solve energy problems;
- 4) improve energy saving activities of the Company by implementing measures to save energy resources, clear delineation of rights, duties and responsibilities of the Company's employees for their implementation;
- 5) develop a system of incentives for energy saving by increasing the interest of the Company's employees in the rational use and saving of energy resources;
- 6) support purchases and project activities of energy-efficient products and services with an impact on energy performance;
- 7) reduce the negative impact on the environment as a result of rational consumption of energy resources and increasing the share of renewable and alternative energy in the total energy balance of the Company;
- 8) provide access to information in the area of energy saving and energy efficiency for all employees of the Company;
- 9) raise the level of competence of the Company's employees in the area of energy saving and energy efficiency.
